

► WILL YOU NOT Prepare Yourselfes? *while Allah prepares his land.*

“Allāh the Generous is preparing His land for something great. And He is more knowing of it. So be prepared to claim any chances and capitalize on it...” – these are the words of Ash-Shaykh Abū Hamzā al-Qurāshi (may Allāh preserve him). Indeed, it is true and we are hopeful of Allah’s help. Allāh prepares his land for events to come. And a person who contemplates will not see the world in the same condition as it was yesterday. Rather he notices a major shift in the condition of people’s affairs and worldly matters. And the intelligent is the one who takes advantage of the changes and looks for a way to re-emerge in order to participate in the revival of the Ummah.

Furthermore, anyone who analyses the history will come to realize that the events occurring at one place in the Muslim world affect the all other places. The events unfolding in the Middle-Eastern countries and the Khurasān region is of the utmost importance to all the Muslim Ummah consisting of warnings, glad tidings and awakenings. Without a doubt, by Allāh’s permission, it is a sign that will awaken the Muslims from the deep slumber they are in today.

If we look at the situation of Muslims two decades ago in

Shām, Irāq, and other countries in the Middle-East we would see most of them heedless and unworried about the state of the Ummah. We would see those Muslims fully dependent on the apostate rulers while being content with being humiliated, and pleased with their souls and properties being controlled by such rulers.

And while they were in this darkness, they had to pay a hefty price in order to learn the meaning of the verse of Allāh: **“And never will the Jews or the Christians approve of you until you follow their religion.” (al-Baqarah 120)**

Allāh sent down upon them the trials, while they were negligent of Jihād, pleased with agriculture and trade, and had forgotten the Hereafter. They were taken by surprise when the crusaders whom they deemed as well-wishers and guardians plunged out openly and mercilessly to snatch away the lands and the resources of the Muslims. Their true faces became apparent, as they took the lives and properties of Muslims without any right. And as of today, millions of Muslims have been butchered in cold blood, or have gone disappeared. And thousands of chaste mothers and daughters of Islam were raped and their children were killed.

Most of these invasions were linked to agreements, negotiations, and transactions that the apostate leaders established between themselves and the crusaders. These agreements enabled the crusaders to have authority and power across Muslim lands. As most of the Muslims believed that they would benefit financially and in other ways by these agreements and alliances. This is what was assumed even though Muslims acquired an abundance of natural resources and assets which the Kuffar lacked. After such agreements, the Kuffar raided Muslim lands claiming the apostates failed in upholding the conditions of the agreements and showing many other similar excuses. And this matter repeated across Muslim countries with only a few differences in the way it happened. The crusader invasions and their oppression crossing of all bounds woke most of the Muslims from their slumber. They returned to the Book of their Lord and stood up in defense of their brethren. And when the warnings and admonitions which the pious Mujāhid scholars were stressing all those years became apparent before their eyes they returned from their ways of heedlessness and became like firm mountains in the path of Allāh. And the remaining ones who did not take heed, and became greedy for the worldly affairs sided with the Crusaders and apostates and thus lost their religion.

Due to its small size, Maldives is occasionally not even drawn on some maps. And it may be that due to its small population and lack of power that other countries may seemingly not give much attention to it. And many of the Muslims have preferred to remain in a state of heedlessness. It has become that even though some are continuously calling out and warning the people of Allah's Punishment, many fails to take heed. Are Maldivians ready to learn their lesson just as how other countries learned it in the past years? Or is it not yet time to act before it becomes too late?

Do you not see the disgusting Hindus who worship everything but Allāh slowly taking control and influence from north to south of Maldives? Do you not see their military base being built in Addu; a base that doesn't even compare with Maldivian military bases? Does it not concern you even a bit about their agreements and negotiations which are bringing their military vessels and plans to surveillance and monitor Muslim lands? Or are you ignorant of the history of those Mushrikīn who have surpassed all boundaries in butchering and torturing Muslims? Rather many were pleased with their so-called **"aids and packages"** which were none other than loans filled with Ribā which would chain the Muslims in the Maldives in a never-ending debt to the Mushrikīn. Debts that might in the end have to be paid by the religion, lives, property, and land of Muslims. And many of those who were displeased kept the matter hidden in their hearts and failed to act while they knew. Then followed the arrival of the crusader foreign minister Mike Pompeo. He came to the Maldives with all their oppression, and with hands still dripping with the warm blood of the Muslims which America and its

allies have spilled over the years. He hastened to establish the first-ever crusader embassy in the Maldives and to initiate military and unknown agreements between the apostate secular rulers of Maldives and the crusaders. For some people, his arrival brought nothing but good. This is because they never cared to look back into the book of Allāh. And they preferred that their religion, honor, and dignity be sold to a small worthless desire of the world. And this is how this mattered unfolded in other parts of the world. And anyone who ponders will see that like all the other lands Allāh is preparing Maldives for bigger matters, without exception and exclusion.

The Mushrikīn and apostates are doing whatever is in their capability to spread their ways of paganism and secularism. And they didn't spare Maldives even though its resources are scarce and their capital is of no match to what the Mushrikīn have. Maldives was not exempted even though its people are unarmed and seemingly did not pose any threat to their giant nations. And so, will you not ponder, what is in their interest with you other than changing your religion, and harming those who refuse? The apostate leaders of Maldives began their smear campaign against the Muwahhidīn by blaming everything on them in hope that the public will turn against them and hand them in. May Allāh ruin their faces and break their backs! This is the cloud of fitnah which erupted in the Middle-East and other parts. And beneath the huge storm, Muwahhidīn remained steadfast, while others were dispersed and lost both their world and Hereafter.

Therefore, we advise and bequest our beloved brothers. While Allāh prepares His land for something imminent and big, how much have prepared for it? Even though there may arise differences in opinions in regards to strategies, approach and planning, there should be no difference in opinion regarding whether Jihad should be carried out against these perpetrators. What benefit will it reap that we blame each other in terms of not acting when in reality each soul will be held responsible for his own actions in the Day of Judgement? And on that Day, you will not be made to carry the burden of anyone else. Therefore, we advise the brothers to stand out and be prepared in terms of taqwā, 'ilm, general awareness of your surroundings, health, and military aspects. You will not be able to prepare later what you weren't able to prepare now. And warn the general Muslims with wisdom in regards to the storm that is erupting over their heads. And do your best to save you and those closest to you from this fitnah, as only the refuge of Allah is to be sought during the trials of Allah. And even though the storm might be huge, Allah has given the glad tidings of a victory and conquest which will follow these trials. Therefore, stand up with the intention and aim to be included among those who fulfill the Promise of Allāh.
